

Link Office 365 and G Suite for Education to SIMS Connect makes it easy

Use the information in SIMS about students and staff, classes and timetables to automatically set up new starters with everything they need in Office 365 or G Suite on the day they join the school

KEEP USERS IN SYNC WITH SIMS

SIMS holds the master data for students and staff
Use this data to manage users, email lists and timetables

Office 365

The classic applications plus Outlook's mail and calendar, and Teams for Education.

Connect

The application that manages the linkage between SIMS, Office 365 or Google.

G Suite for Education

A set of fully integrated online applications, alongside access to Google Classroom.

Save time and effort and always be up to date

Microsoft Office 365 for Education and G Suite for Education are the backbone of IT delivery, for students and staff, in the majority of schools. The administration of these systems, especially with a dynamic student population, can be time consuming.

All the information you need to manage users, licensing, distribution lists and even push timetables to individuals' calendars is already in SIMS. With Connect you can synchronise Office 365, or Google with SIMS daily. This includes the creation of the new student intake each year.

Connect: safe and secure

Connect sits entirely within your network. This means that the only system drawing data from SIMS is yours.

The data is moved from your SIMS instance to your Microsoft or Google domain and nowhere else.

Security by design and default.

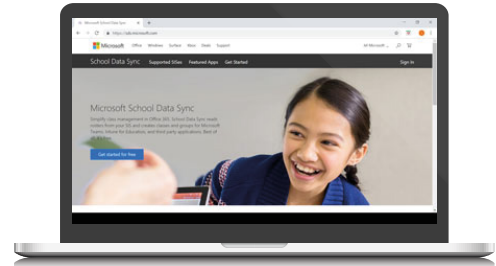

FEATURES THAT MAKE MANAGING USERS EASIER

AUTOMATED SYNC

Your Active Directory, Office 365 and Google users will be updated based on changes in SIMS. This includes disabling accounts of leavers as well as creating them for joiners.

MANAGE MICROSOFT SDS

Microsoft have put a great deal of effort into their School Data Sync service. Connect enables you to transfer user data to SDS directly from SIMS.

CONTROLLED BY YOU

You can set the schedule for updates depending on the types of users and the purpose the data is being used for. You're in complete control with Connect.

GDPR COMPLIANCE

GDPR demands that personal data is accurate and up to date. That's exactly what Connect does, data in Google and Office 365 accurately reflects what's in SIMS.

Connect does much more for you. These features all come as standard.

Active Directory Users

Create Active Directory users directly from the information in SIMS for new students and staff.

User Creation

Automatically create or disable users in Office 365 or Google, based on your SIMS data.

Timetables

Don't print timetables. Connect pushes them straight to Outlook and Google calendars.

Granular Licensing

Office 365 requires you assign licences for apps. Connect allows you to decide who gets what.

Distribution Lists

Staff lists, departments, classes, year groups and more can be set up as email distribution lists.

Office 365 Groups

A group can share a calendar or a resource library. Great for projects or staff teams.

Class Structure Update

Connect can help you sync emails and class structures with other applications.

Track SIMS Updates

Capita updates SIMS regularly. You'll always get an update of Connect to match.

Technical Helpdesk

Got a problem, call or email the technical helpdesk. Full support included in the price.

Connect - one of a family of solutions for education

Connect sits in the heart of your IT systems linking together SIMS and your other applications. This means that it can also support a variety of other applications. This includes the products of our sister companies:

GDPR Sentry

GDPR Sentry is a specialist provider of support for the data protection requirements of education providers. The organisation provides outsourced data protection officer services, helpdesk, auditing and training services in addition to the Sentry Compliance Management System.

To deliver training through the system every member of staff needs to be registered. Taking information from the Management Information System, or HR system, Connect enables users to be easily created and kept up to date.

Lessonboard

Lessonboard is simple to use, enabling teachers to quickly prepare and present lessons, share resources and set homework for students.

It's local install ensures a fast performance, with no reliance on the internet.

The system provides a high level of overall security, as no data is shared externally.

The user and timetable data is synced directly from Capita SIMS on a daily basis.
